DETAILED ACTION

Species Election

Claims 1 and 34 are generic to the following disclosed patentably distinct species: **first and second hydrogel coatings, medical devices, ionic crosslinking agents, covalent crosslinking agents, contrast agents**. The species are independent or distinct because the different species have mutually exclusive characteristics for each identified species. In addition, these species are not obvious variants of each other based on the current record. An example of a specific **first hydrogel coating is alginic acid, and example of a medical device is a coronary stent, an example of an ionic crosslinking agent is calcium ions, an example of a covalent crosslinking agent is a polyfunctional aziridine, and an example of a contrast agent is gadolinium**.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of medical device for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant must disclose what type of medical device is claimed, what the first and second hydrogels are composed of, what crosslinking agents are used and in which layers, what contrast agents are used and in which layers, and whether a third lubricious coating is applied.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would

not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Because the restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See MPEP § 812.01. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LANCE RIDER whose telephone number is (571)270-1337. The examiner can normally be reached on M-F 11-12 and 1-4.
